The Journal of Science and Medicine in Sport is an international refereed research publication covering all
aspects of sport science and medicine.. The Journal considers for publication Original Research and Review
Papers in the sub-disciplines relating generally to the broad sports medicine and sports science fields: sports
medicine, sports injury (including injury epidemiology and injury ...

This paper reviews the current pathways for recycling of solid plastic waste, via both mechanical and
chemical recycling. " The predominant industrial technologies, design strategies and recycling examples of
specific waste streams are reviewed.

Mechanical and chemical recycling of solid plastic waste

1. Introduction. Nanocomposites are composites in which at least one of the phases shows dimensions in the
nanometre range (1 nm = 10⁻⁹ m) 1. Nanocomposite materials have emerged as suitable alternatives to
overcome limitations of microcomposites and monolithics, while posing preparation challenges related to the
control of elemental composition and stoichiometry in the nanocluster phase.

Nanocomposites: synthesis, structure, properties and new

A metal matrix composite (MMC) is composite material with at least two constituent parts, one being a metal necessarily, the other material may be a different metal or another material, such as a ceramic or organic compound. When at least three materials are present, it is called a hybrid composite. An MMC is complementary to a cermet

Metal matrix composite - Wikipedia

The literature treating mechanisms of catalyst deactivation is reviewed. Intrinsic mechanisms of catalyst deactivation are many; nevertheless, they can be classified into six distinct types: (i) poisoning, (ii) fouling, (iii) thermal degradation, (iv) vapor compound formation accompanied by transport, (v) vapor-solid and/or solid-solid reactions, and (vi) attrition/crushing.

Mechanisms of catalyst deactivation - ScienceDirect

Science Fiction news - Summer 2018

Får att en korrosionsprocess ska kunna ske måste metallen utsättas för ett oxidationsmedel samtidigt som elektroner måste kunna vandra från en anodyta till en katodyta. [7] Korrosionsprocessen består av två halvceller, nämligen oxidation och reduktion. [8] Där oxidationen sker, sker även angreppet på metallen.
