Fruit brandy or fruit spirit is a distilled beverage produced from mash, juice, wine or residues of edible fruits. The term covers a broad class of spirits produced across the world, and typically excludes beverages made from grapes, which are referred to as plain brandy (when made from distillation from wine) or pomace brandy (when made directly from grape pomace).

It's taken 21 months, four professors, and three associate/assistant professors, and THIS is the best they could come up with? The printed version listed no author (the pdf has been updated with John Cooks name*) yet wears the logo of the University of Western Australia (UWA), which will embarrass that university as word spreads of the intellectual weakness of their "Guide".
