The Embedded Design Handbook complements the primary documentation for the Intel tools for embedded system development. It describes how to most effectively use the tools, and recommends design styles and practices for developing, debugging, and optimizing embedded systems using Intel -provided tools. The handbook introduces concepts to new users of Intel â€™s embedded solutions, and helps to ...

Stair Construction is a sample Architecture and Construction lesson created by a CTE and math teacher team from Colorado. The lesson's objective is to prepare students to design a stair layout and then build a set of stairs using the constraints for building projects within the architecture and construction field.
