The electron is a subatomic particle, symbol e^- or β^- , whose electric charge is negative one elementary charge. Electrons belong to the first generation of the lepton particle family, and are generally thought to be elementary particles because they have no known components or substructure. The electron has a mass that is approximately 1/1836 that of the proton.

The cathode-ray tube (CRT) is a vacuum tube that contains one or more electron guns and a phosphorescent screen, and is used to display images. It modulates, accelerates, and deflects electron beam(s) onto the screen to create the images. The images may represent electrical waveforms (oscilloscope), pictures (television, computer monitor), radar targets, or other phenomena.

In the late 1980s I tested as many push-pull transformers as I could get ahold of. The test bed was a modified Heathkit W-6 amplifier with push-pull 6550s.

Fundamentals of Engineering Electronics, William Dow, 1937, 617 pages - Courtesy of an anonymous donor. A very unassuming title for a 617-page engineering book! The first part of the book has a rather in-depth treatment of vacuum tube operation, and details of amplifier circuit design.

Electron beam welding, despite a long history and widespread arc and laser technology, is still widely used in industry. The main applications for this high efficiency welding process are: automotive, electronics, electrical engineering, aerospace and mechanical engineering industry.

Shortwave Listening My main interest is in propagation and in particular chip sounders. See the September '93 issue of Popular Communications article "Monitoring the World's ionosounds" by Andrew W. Clegg. This is about the BR Communications (now part of TCI/BR in Sunnyvale, CA) chirp sounders. Another aspect of High Frequency listening is called utility stations, these are all stations other ...

The fate of pollen and pollen tubes can have a profound effect on fruit and seed production. Experiments were conducted to investigate pollen viability, in vitro pollen germination and in vivo pollen tube growth in the biofuel seed crop *Jatropha curcas*. It was possible to distinguish between fresh and dead pollen using 2,3,5-triphenyltetrazolium chloride (TTC).

The μ Tracer, a miniature Tube Curve Tracer / Tester. This extremely small Tube Tester measures tube characteristics in a pulsed mode. In this way the circuit can be kept very small while the use of "heavy" high power / dissipation components can be avoided.

9.SHOP PRACTICES. Knowing about good electronic shop practices begins with introduction to the basic tools and test instruments used in electronic repair, production and troubleshooting. It continues with "hands-on" activity directed towards learning practical skills such as soldering and de-soldering and making connecting leads and cables.
