

### **geometry of complex numbers pdf**

Definition. A split-complex number is an ordered pair of real numbers, written in the form  $x + jy$  where  $x$  and  $y$  are real numbers and the quantity  $j$  satisfies  $j^2 = -1$ . Choosing  $j = \hat{i}$  results in the complex numbers. It is this sign change which distinguishes the split-complex numbers from the ordinary complex ones. The quantity  $j$  here is not a real number but an independent quantity.

A complex number is a number that can be expressed in the form  $a + bi$ , where  $a$  and  $b$  are real numbers, and  $i$  is a solution of the equation  $x^2 = -1$ . Because no real number satisfies this equation,  $i$  is called an imaginary number. For the complex number  $a + bi$ ,  $a$  is called the real part, and  $b$  is called the imaginary part. Despite the historical nomenclature "imaginary", complex numbers are ...
