Surface tension is the elastic tendency of a fluid surface which makes it acquire the least surface area possible. Surface tension allows insects (e.g. water striders), usually denser than water, to float and slide on a water surface. At liquid-air interfaces, surface tension results from the greater attraction of liquid molecules to each other (due to cohesion) than to the molecules in the ...

In mathematics, the Laplace transform is an integral transform named after its discoverer Pierre-Simon Laplace (/ l ɛ ɪ ˈ p l ɛ ɪ • s /).It takes a function of a real variable t (often time) to a function of a complex variable s (complex frequency).. The Laplace transform is very similar to the Fourier transform.While the Fourier transform of a function is a complex function of a real variable ...
