Programming the infotainment systems (Fig. 1) on GM vehicles often involves downloading the latest calibrations from TIS2Web through the Service Programming System (SPS).

Infotainment System Programming: USB or SPS | TechLink

A software system is a system on intercommunicating components based on software forming part of a computer system (a combination of hardware and software). It "consists of a number of separate programs, configuration files, which are used to set up these programs, system documentation, which describes the structure of the system, and user documentation, which explains how to use the system".
