Centrifugal Pump Curves . For a given centrifugal pump operating at a constant speed, the flow rate through the pump is dependent upon the differential pressure or head developed by the pump. The lower the pump head, the higher the flow rate.

Centrifugal Pump Operation and Solutions of problems

Centrifugal pumps are not very tolerant of abuse and more than half pump faults can be avoided at this stage. Hindsight most often appears after this point. This is a large section and it is valid to split it into a hydraulic section and a mechanical section.
